#### Commentary:

- September 2022 permit numbers reflect decreased construction values and decreased construction activity as compared with September 2021. Per our stats, this has been the trend for all of Q3.
- Of the permits issued this month, 50% were for new residential units spread throughout the region, with other notable permits including the Loon Lake Fire Hall build, and an industrial agricultural operation in Area “E”.
- (17) new applications were received in the month, signaling a continuation of reduced new permits.
- Inspection and administration activity centered around service delivery for existing permit-holders.
