

SRC Week 3: The Outdoors and Nature

Fact or Fiction

Below are several statements about indoor and outdoor crime scenes. Read them carefully and make a guess about which ones are true and which are false!

1. Outdoor crime scenes are the most vulnerable to loss, damage, and contamination of biological evidence.

Fact

Fiction

2. Crime scenes are easy to secure, regardless of where they're located.

Fact

Fiction

3. Rapid and effective protection of crime scenes can help protect valuable evidence from rain, snow, heat, wind, or other environmental conditions.

Fact

Fiction

4. Processing outdoor crime scenes at night doesn't pose any risks for missing or destroying evidence.

Fact

Fiction

5. It is more likely that evidence will be lost or contaminated at indoor crime scenes, because more people are accessing it and going in/out.

Fact

Fiction

6. When investigators encounter a crime scene that is partially indoor and outdoor, they should always process the outdoor component first.

Fact

Fiction

Answer Key for Fact or Fiction

1. True
2. False
3. True
4. False
5. True
6. True

Spot the Difference

Compare the images and see if you can identify the things that have been changed between them! There are **8 differences** in the balloon-themed pictures, and **7 differences** in the popcorn-themed ones! The answer keys can be found below each set of images.
